### **DETAILED ACTION**

A telephone call was made to Jack Friedman on (518) 220-1850 to request an oral election to the above restriction requirement, but did not result in an election being made because it appears as if the telephone number listed in the oath is not correct.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to latch, classified in class 327, subclass 200.
- II. Claims 10-25, drawn to a frequency divider, classified in class 377, subclass 47.
- III. Claims 26-30, drawn to a frequency divider, classified in class 377, subclass 47.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2816

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are structurally distinct. For example, the latch of claims 1-9, is structurally distinct from the latch recited in claims 16 and 23. More particularly, the latch of claims 16 and 23 an entirely different connective relationship between the inputs and outputs of the inverter stages in comparison to the structure recited in claims 1-9. Thus, they are not the same latches. Similarly, the structure of the frequency divider of claims 26-30 defines an entirely different structure than the frequency divider of claims 10-25.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Margaret R Wambach whose telephone number is (571)272- 1756. The examiner can normally be reached on Monday, Tuesday, Thursday and Friday 6am-4:30pm.
